Intelligence

WORK EXPERIENCE

November 2018

IT Technician Assistant

Copland College, Internship | Melba, ACT

- Coordinated in a team of 3 students working closely with an IT technician of Copland College to assist them in the following:
- Mapping computer network topologies and recording their IP addresses.
- Maintaining and creating registers of tested software programs for campus devices.
- Asset management, including recording laptop barcodes and packing/unpacking between campuses.
- Troubleshooting incidents.

August 2021 - November 2021

Front-End Web Developer

KDDart / University of Canberra, Internship | Bruce, ACT

- Coordinated in a team of 4 skilled in project management, programming, graphic design and web design.
- Discussed, designed and documented solutions for modernising the display and accessibility of a database web interface product.
- Scheduled regular meetings with the client for progress updates, concerns and prospective changes.
- Implemented reactive CSS web visuals, a modernised and branded colour scheme and intuitive layout facelifts.
- Implemented cross-platform accessibility.
- Design implementations based on the product's target audience expectations and requirements via research.
